

## Total Japanese PSA Tape Production 2015

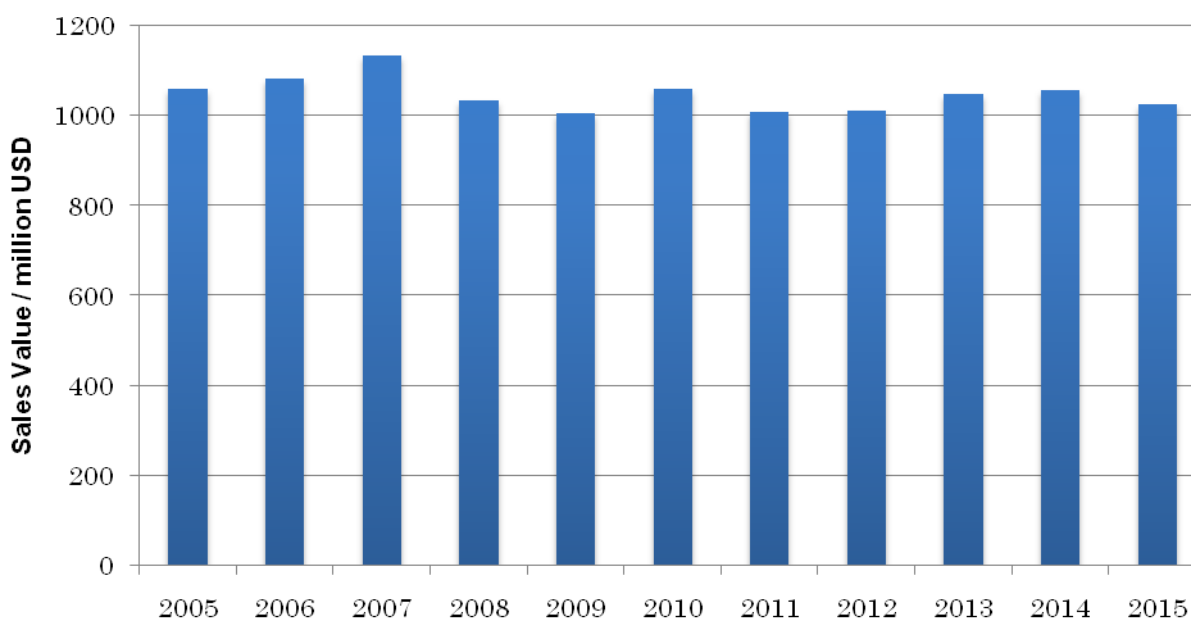

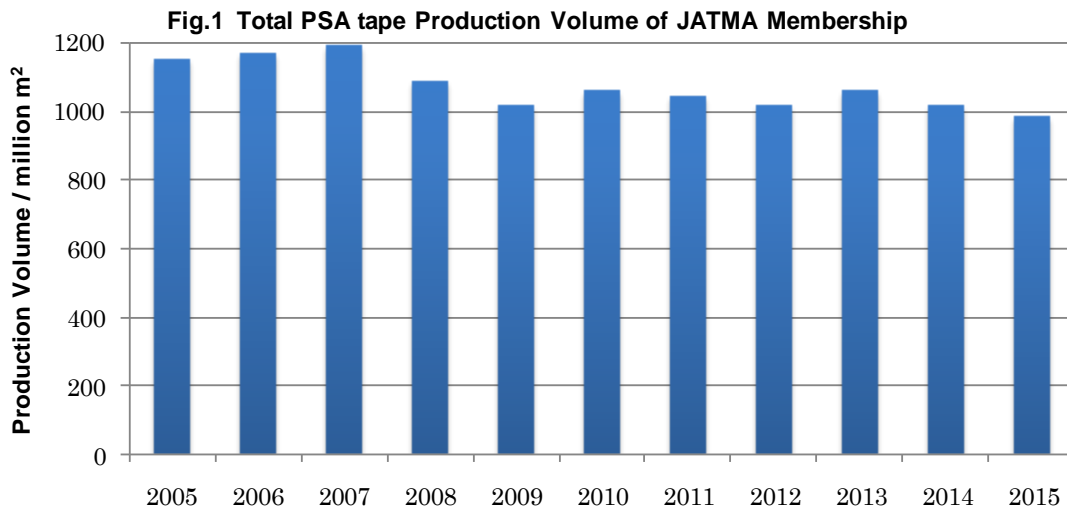

2015 PSA Tape output in Japan is estimated at 983.27 million m<sup>2</sup> which is the lowest in the last decade during 2005 – 2015.

In the last decade, the tape output was limited to the range of 1000 – 1200 million m<sup>2</sup>.

On the other hand, the sales revenue was 1024.42 million USD ( 120 ¥/USD ), the same level as that of 2008.

Though the output volume has not increased, the sales revenue was improved because expensive PSA tape production increased as shown in Figure 1 and 2.

The aforementioned figures come from the 18 JATMA members and cover 70% of the total Japanese PSA tape production.
